BLU Logic Hands Free System, Small Button, Non-JBL, Non-Navigation

The BLU Logic^{®1} hands-free system integrates with the factory audio system to initiate and answer cellular phone calls, enabling cell phone use that is essentially "hands free". Owners can listen to incoming and outgoing cellular calls through the front factory speakers and a small microphone is designed to capture the voices of vehicle occupants. Incoming calls are answered with the push of a button. Outgoing calls are placed by cellular phone dialing and speaking into the fixed microphone provided. The sound level of incoming calls is easily adjusted up or down with simple, clearly identified button functions.

Note: BLU Logic conflicts with: 1) Audio with JBL is a conflict or 2) Audio with Navigation is a conflict. Factory audio with embedded Bluetooth is a conflict. Please confirm that a knock-out plate is available in the vehicle to mount the switch prior to ordering. This part does not conflict accessory satellite radio.

REMOTE START W/ SMART KEY

The VIP Remote Engine Starter allows vehicle owners to start the engine before entering the vehicle—as well as to activate the air conditioner, heater, defroster and defogger functions—so owners can have their vehicle ready and waiting with a comfortable interior temperature. And because it's fully integrated into the vehicle's existing factory security/keyless entry system, there's no need for an additional remote. The remote engine starter is operated by pushing the "lock" button on the keyless entry fob in a quick, three-step sequence: (1) push and release "lock" button; (2) push and release "lock" button again; (3) then push and hold "lock" button for three seconds—and the engine starts. The engine can also be stopped remotely by pushing the "unlock" button once, or by pushing and holding the lock button for two seconds or more.
